ELITE

ELITE Magazine - New Star on the Market

March 6, 2014

"With so many options on the market it is sometimes hard to discern which skin care brands and products truly work and are worth their price. Here are some of our favorite brands and some of their star products, and why we like them. Indulge your skin with some of the most luxurious brands on the market!

The new star on the market! Developed by Detlef Fuhrmann, a German scientist and former CEO of a pharmaceutical company, who discovered that Colostrum (derived from cow's milk) contained several ingredients that had unique and powerful anti-aging properties. Clinical tests performed over 56 days showed that Immupure excelled in anti-aging benefits, and that it renewed collagen production by up to 400%! The line consists of an Anti-Aging Repair Cleanser (\$65), Lifting Eye Serum (\$135), Microinjected Wrinkle Smoothing Serum (\$135), Daily Eye Face Neck Firming Moisturizer (\$210), Night Intense Repair and Hydrating Cream (\$215), and a Hydrating and Rejuvenating Body Cream (\$180). immupure.com"
